Abstracting Services

This journal is covered by many Abstracting and Indexing Services including: Cambridge Scientific Abstracts, Chemical Abstracts, Chemistry Citation Index (CCI), Compendex, Congressional Information Service, Inc., Corrosion Abstracts, Current Abstracts (EBSCO), Current Contents, EIC/Intelligence (Energy Information Abstracts), Engineering Index Monthly, Fuel and Energy Abstracts, INSPEC, Leadscan, Metals Abstracts, OCLC Contents Alert, PASCAL/CNRS, Referativnyi Zhurnal VINTI-RAN (Russian Academy of Sciences), Science Citation Index, SCOPUS®, TOC Premier, Web of Science. Full text available on ScienceDirect®.

Contents

Aqueous Batteries: ENG/APP

A rechargeable aqueous dendrite-free zinc ion battery with robust performance enabled by the design of electrolyte additive

Y. Guo, Y. Jia, S. Wang, L. Wang, S. Liu

236981

Exceptional manganese cyclic utilization enabled by redox mediator-mediated Mn²⁺/MnO₂ deposition/dissolution in a manganese-free acidic aqueous electrolyte

Y. Dai, Z. Wang, J. Zhang, M. Li, R. Li, G. Zhao, B. Wang, Y. Hao, M. Hu, J. Yang

236923

Aqueous Batteries: SCITECH

Hierarchical carbon shell@C₃N₄ incorporated graphite felt as electrode for vanadium redox flow batteries

J. Bao, W. Yang, K. Xu, Z. Li, Y. Kong, L. Sun, Y. Shi

236741

Sustainable, dendrite-suppressing, and robust citric acid cross-linked carboxymethyl cellulose-based quasi solid-state electrolyte for zinc-ion batteries

S. Ganguly, S. Puravankara

237005

Lithium and other Non-aqueous Batteries: ENG/APP

Enhancing interpretability in data-driven battery capacity estimation through degradation mode analysis

X. Feng, Y. Zhang

236938

Upcycling strategy of spent LiCoO₂: Toward enhanced high-voltage stability based on Al doping

H. Lin, G. Zhao, X. Kang, W. Zhang, Y. Chen, G. Xu, K. Zhong, J.-M. Zhang, Z. Huang

236950

The microwave-assisted spray drying synthesis: application to the LiFePO₄/C cathode material for Li-ion batteries

E.A. Styuf, M. Othman, A.A. Savina, A.I. Komayko, D.S. Filimonov, V.A. Nikitina, A.M. Abakumov

236951

Robust and generalizable lithium-ion battery health estimation using multi-scale field data decomposition and fusion

X. Huang, S. Tao, C. Liang, R. Ma, X. Wang, B. Xia, X. Zhang

236939

Engineering self-adaptive composite binders for micron-sized SiO_x in lithium-ion battery anodes

R. Li, Z. Yang, Y. Liu, J. Liu, S. Chen, T. Huang, F. Tu, H. Liu

236961

A new class of solid electrolytes with an ultra-low Na-ion migration barrier

A.D. Dembitskiy, S.N. Marshenya, E.V. Antipov, S.S. Fedotov, D.A. Aksyonov

236979

Water-soluble binder for improved specific capacity and initial coulombic efficiency of hard carbon anode in sodium-ion batteries

T. Zhang, C. Zhao, T. Zhang, F. Ran

236989

Fast charging and high-efficiency sputter-deposited silicon thin film anodes for Li-ion batteries

G. Elomari, H. Larhlimi, R. Oubaki, E. Elmaataouy, M. Aqil, Y. Samih, M. Makha, C. Negrila, J. Alami, M. Dahbi

236967

JOURNAL OF POWER SOURCES

The International Journal on the
Science and Technology of Electrochemical Energy Systems

Available online at www.sciencedirect.com

ScienceDirect

Aims and Scope

The *Journal of Power Sources* is the journal for researchers and technologists interested in all aspects of the science, technology and applications of sources of electrochemical power.

Journal of Power Sources publishes original research and reviews about the science and applications of primary and secondary batteries, fuel cells, supercapacitors and photo-electrochemical cells. Topics considered include the research, development and applications of nanomaterials and novel componentry for these devices. Examples of applications of these electrochemical power sources include:

- Portable electronics
- Electric and Hybrid Electric Vehicles
- Uninterruptible Power Supply (UPS) Systems
- Storage of renewable energy
- Satellites and deep space probes
- Boats and ships, drones and aircrafts
- Wearable energy storage systems

Publication information: *Journal of Power Sources* (ISSN 0378-7753). For 2025, volumes 625–660 are scheduled for publication. Subscription prices are available upon request from the Publisher or from the Elsevier Customer Service Department nearest you or from this journal’s website (<http://www.journals.elsevier.com/journal-of-power-sources/>). Further information is available on this journal and other Elsevier products through Elsevier’s website: (<http://www.elsevier.com>). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.

Author inquiries: You can track your submitted article at <http://www.elsevier.com/track-submission>. You can track your accepted article at <http://www.elsevier.com/trackarticle>. You are also welcome to contact Customer Support via <http://service.elsevier.com>.

Advertising information: If you are interested in advertising or other commercial opportunities please e-mail Commercialsales@elsevier.com and your enquiry will be passed to the correct person who will respond to you within 48 hours.

Funding body agreements and policies: Elsevier has established agreements and developed policies to allow authors whose articles appear in journals published by Elsevier, to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit <http://www.elsevier.com/fundingbodies>

Orders, claims, and journal inquiries: Please visit our Support Hub page <https://service.elsevier.com> for assistance.

This journal and the individual contributions contained in it are protected under copyright, and the following terms and conditions apply to their use in addition to the terms of any Creative Commons or other user license that has been applied by the publisher to an individual article:

Photocopying

Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission is not required for photocopying of articles published under the CC BY license nor for photocopying for non-commercial purposes in accordance with any other user license applied by the publisher. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Derivative Works

Users may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions or companies. Other than for articles published under the CC BY license, permission of the publisher is required for resale or distribution outside the subscribing institution or company.

For any subscribed articles or articles published under a CC BY-NC-ND license, permission of the publisher is required for all other derivative works, including compilations and translations.

Storage or Usage

Except as outlined above or as set out in the relevant user license, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the publisher.

Permissions

For information on how to seek permission visit www.elsevier.com/permissions

Author rights

Author(s) may have additional rights in their articles as set out in their agreement with the publisher (more information at <http://www.elsevier.com/authorsrights>).

Notice

Journals published by Elsevier comply with applicable product safety requirements. For any product safety concerns or queries, please contact our authorized representative, Elsevier B.V., at [HYPERLINK “mailto:productsafety@elsevier.com”](mailto:HYPERLINKmailto:productsafety@elsevier.com)productsafety@elsevier.com

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds or experiments contained herein. Health care practitioners must exercise their professional judgement and make all treatment-related decisions based solely on the specific conditions of each patient. Because of rapid advances in the medical sciences, independent verification of diagnoses and drug dosages should always be made. The content is provided “as-is” and Elsevier makes no representations or warranties, whether express or implied, as to the accuracy, completeness, or adequacy of any content. To the fullest extent permitted by law, Elsevier assumes no responsibility for any damages, adverse events, or liability arising from use of information contained herein including for any injury and/or damage to persons or property, whether as a matter of product liability, negligence or otherwise.

Inclusion of any advertising material in this publication does not constitute a guarantee or endorsement of the quality or value of such product or service or of any of the representations or claims made by the advertiser.

Language (usage and editing services)

Please write your text in good English (American or British usage is accepted, but not a mixture of these). Authors who feel their English language manuscript may require editing to eliminate possible grammatical or spelling errors and to conform to correct scientific English may wish to use the English Language Editing service available from Elsevier’s WebShop <http://webshop.elsevier.com/languageediting/> or visit our customer support site <http://service.elsevier.com> for more information.

(Contents continued from outside back cover)

Thermal plasma synthesis towards upscaling of multi-cation lithium nickel manganese cobalt oxide cathodes	
R. Viswanathan, A. Pasupathi, S.E. A, V. J, Y. Subramaniam, R. Murugan, S.P. Jose	236943
Regulation of the electrochemical performance of Na ₃ V ₂ (PO ₄) ₂ F ₃ as an Na storage material through electron redistribution by Bi-doping	
Z. Bai, A. Wang, Y. Wang, N. Wang, Y. Chai	236941
Quantitative investigation of heterogeneous lithium plating induced by temperature heterogeneity in large-format lithium-ion batteries	
B. Zhang, S. Mao, L. Tong, X. Liu, K. Lu, X. Li, Y. Wang, H. Zhang, X. Han, Y. Xu	237004
Na-site and Mn-site synergistic element doping to construct Na _{0.62} K _{0.05} Mn _{0.7} Fe _{0.2} Co _{0.1} O ₂ cathode material and its electrochemical energy storage performance	
W. Fengchun, T. Meixian, L. Jiayi, Z. Wentao, S. Yuhang, J. Qi	237007

Lithium and other Non-aqueous Batteries: SCITECH

Insights into the structural degradation and dual modification to enhance structural and cycling stability in LiN _{0.8} Co _{0.1} Mn _{0.1} O ₂	
L. Wang, Q. Su, W. Shi, Y. Wang, G. Wang, B. Han, J. Guo, R. Ye, G. Du, M. Zhang, W. Zhao, S. Ding, Y. Yang, B. Xu	236907
Application of digital image correlation technology in investigating mechanical-related issues of lithium batteries	
Z. Wang, X. Zhang, C. Dai, Y. Wang, Q. Liu, M. Jiao, Q. Li, L. Mi, W. Mao	236965
Boosting the cycle life of solid-state Li–CO ₂ battery through integration of a polymer/ceramic composite electrolyte	
Q.-C. Zhu, S.-J. Li, J. Ma, F.-L. Zhang, D.-Y. Mao, H. Li	236976
Polyaniline intercalated lithiation-assisted exfoliation of MoS ₂ cathode enables ultra-high rate and durable rechargeable magnesium ion batteries	
C. Pan, M. Cheng, R. Wang, Q. Liu, J. Hu, T. Wei, M. Chen, B. Liu, W. Li	236998
Improving Li anode performance with Cu@N-C nanowire modified Cu foam as a stable 3D-Host	
S. Li, S. Wang, M. Hu, W. Guan, Z. Xu, S. Fang, X. Ge, B. Li, M. Liu	236949
Lithium nitrate reservoir enabling substantial improvement in the cycle life of anode-free and lithium metal batteries	
M.-K. Oh, J.-W. Kim, H.-S. Kim, D.-W. Kim	237011
Multi-scavenging functional separator ensuring the cycling stability of high energy density lithium-ion batteries	
D.-A. Lim, J.-H. Seok, S.-J. Lim, D.-W. Kim	237016

Other Electrochemical Power Sources: ENG/ APP

Bio-cathode-enhanced zinc-air desalination battery (ZADB): A promising approach for integrated salinity removal and energy harvesting	
R. Rabiee, S.M. Zamir, H.R. Abbasi, M. Sedighi	236937
Enhancing heat-source free water-floating single-walled carbon nanotube thermoelectric generators with water-absorbing paper	
Y. Nakazawa, S. Ochiai, Y. Okano, R. Okutsu, Y. Amma, M. Takashiri	236966
Facile preparation of phosphorous-doped graphene quantum dots/bismuth iron vanadate composite as bifunctional electrocatalysts for water splitting	
B.M. Babu, M.J. Kim, T.S.K. Sharma, W.M. Choi	236999

Other Electrochemical Power Sources: SCITECH

Sustainable electrochemical energy generation using ultrathin nanoflakes of mixed phase CoMnMoS as a robust electrocatalyst	
A.S. Salunke, R.P. Patil, N.K. Shrestha, S. Cho, H. Im, A.I. Inamdar	236954
Fabrication and investigation of anion exchange membranes based on poly(terphenyl piperidonium) copolymers with dibenzothiophene or dibenzofuran units for water electrolysis	
Z. Peng, T. Wei, Q. Wang, Y. Zhao, J. Yang	236918
First-principles study of structural, hydrogen storage, mechanical, electronic, and optical properties of K ₂ NaXH ₆ (X = Al, As, Bi, Ga, In) double perovskite hydrides	
A. Obeidat, A. Alrousan, S. Abu-Rajouh	236944
Bifunctional framework activated carbon graphite felt composite electrodes for high-performance vanadium redox flow battery	
X. Xie, M.-J. Li, R. Wang, L. Fei	236987

Alkaline Fuel Cells: SCITECH

Enhancing the trifunctional electrocatalytic activity of Fe-Co-Ni multi-component alloys using a zinc dealloying strategy	
H. Xu, S. Li, K. Chang, J. Huang, Q. Wang, C. Zhang, H. Miao, J. Yuan	236956

Biofuel Cells

In-situ electrochemical polymerization of dopamine at cell-electrode interface enhances the extracellular electron transfer efficiency of <i>Shewanella</i>	
A. Luo, J. Li, Z. Mao, X. Yi, X. Zhou, M. Zhao, J. Song, Y. Yi	236963
Industrial applications of enzymatic fuel cells: Utopia or reality?	
M. Saad, K. Krukiewicz, M. Berthuel, J. Hammond, S. Cosnier	236990

Direct Fuel Cells: SCITECH

Performance and sulfur tolerance of direct biomass fuel cells	
M. Kawase, A. Ido	236880

Polymer Electrolyte Membrane Fuel Cells: ENG/ APP

Understanding the use of carbon-based porous transport layers at the cathode in PEM water electrolysis	
N. Hensle, J. Hoffmann, Z. Najafianashrafi, T. Smolinka, P.-Y. Abel Chuang, A. Weber	236913
Innovative polymer-based, miniaturized solid-state reference electrode: A sustainable solution for potentiometric and electrochemical power sources	
K.M. Kelani, B.A. El-Zeany, E.S. Elzanfaly, M.K. Halim, A.E.F. Abbas, A.S. Saad	236945
Repetitive control strategy for grid integration of vehicular fuel cells to enhance system stability and robustness	
M. İnci, Ö. Çelik	236992
Enhancing polymer electrolyte membrane fuel cell performance and efficiency: Plasma-treated effects of expanded polytetrafluoroethylene in reinforced composite membranes	
W. Heo, D.-H. Han, S.-J. Oh, J.U. Yoon, I. Woo, S.-E. Choi, J.-M. Yoon, J.W. Bae	237010

(Contents continued on Back Matter)
