Correlating storage mechanism and solid electrolyte interphase kinetics for high-rate performance of hard carbon anode in ether electrolytes for sodium-ion batteries			
S. Manna, P. Verma, S. Puravankara	236234	In-situ growth of $\text{Ni}_{2.86}\text{Te}_2$ and Mo_6Te_8 telluride catalysts on foam NiMo substrates for enhanced oxygen evolution performance	236244
Duplex core-shell $\text{Co@Co}_9\text{S}_8\text{@NSC}$ nanocrystals for high-performance lithium-sulfur battery through synergistic capture-catalysis-conversion of polysulfide		W. Yang, W. Wang, S. Deng, Q. Ji, Y. Guo, T. Long	
X. Peng, P. Wan, L. Yuan, S. Li, S. Jing, F. Xiao, L. Zeng, Y. Tian, Z. Luo, H. Fan	236310	High aluminum storage performance achieved through Ni^{2+} doped polyaniline accelerating the conversion of different N structures	236295
Coupling of $\text{FeS}_{2-x}\text{Se}_x$ nanoparticles and foam-like carbon superstructure to achieve high-density electron flow for enhanced sodium storage performance		Z. Liu, T. Zhang, H. Wen, P. Hu, L. Chen, J. Qiao, J. Wu, J. Yang	
T. Feng, F. Wang, H. Zhang, F. Guo, T. Yang, H. Li, B. Zhao, Y. Liu, H. Wu, Y. Xiong, F. Ren	236293	Achievement of high n-type thermoelectric performance and stretchability in single-walled carbon nanotubes/polyethyleneimine /polyvinylpyrrolidone composites: Enabling self-healing and sensitive self-powered temperature sensors	236300
Understanding the electrochemical decomposition of Li_2CO_3 artificial interface layer on Li-rich layered cathodes for cycle stability		B. Zhao, Y. Yan, Y. Huang, Z. Chen, Y. Liang, Z. Luo, C. Gao, L. Wang	
Z. Zhou, Y. Zhu, Z. Liu, B. Qiu	236317	Alkaline Fuel Cells: SCITECH	
Effect of carbonization temperature on the electrochemical performance of monodisperse Carbon/ SiO_2 nanocomposites as lithium-ion batteries anode		Investigation of NiFe alloy foams at high oxygen evolution reaction rates using a dry anode setup in alkaline environment	236245
X. Dong, C. Woo, S. Oh, Y. Kim, X. Zhang, K.I. Kim, K.H. Choi, J. Kang, S. Jeon, H.-S. Bang, H.-S. Oh, H.K. Yu, J. Mun, J.-Y. Choi	236291	E. Berner, G.K.H. Wiberg, M. Arenz	
In situ lithium plating monitor for lithium-ion batteries enabled by operando pressure detection		Investigation of the structure-activity relationship of phosphorus-doped Fe-Cu@NC catalysts: Exploring the influence of different coordination layers on oxygen reduction reaction activity	
Y. Zhu, L. Yan, S. Han, M. Gu, S. Ma, Y. Luo, A. Meng, C. Zhao, J. Xie, C. Yang, Q. Li	236281	Y. Wu, P. Ren, R. Li, X. Zheng, C. Bai, Y. Liu, F. Meng, X. Peng, L. Xiao, A. Liu, H. Xu, D. Wang, J. Zhang, M. An, S. Wen, Y. Li, P. Yang	236302
Improving lithium-ion battery safety through separators with thermal shutdown characteristics induced by thermal expansion microspheres		Biofuel Cells	
I.F. Monteiro, M.M. Silva, A. Fidalgo-Marijuan, R. Gonçalves, C.M. Costa, S. Lanceros-Mendez	236311	Insight into the enhancing mechanism of extracellular electron transfer on ordered sulfur exposure using frozen-ultraviolet irradiation	236212
Sulphuration reduction interphase constructed by a simple solid phase to stabilize the $\text{LiCoO}_2/\text{Li}_6\text{PS}_5\text{Cl}$ interface in all-solid-state lithium-ion batteries		X. Zhu, Y. Gao, Y. Chen, Q. Wen, J.-I. Yin	
M. Zhang, S. Zhang, C. Liu, Z. Zhuo, Y. Lei, D. Xiao, C. Yao, W. Fu, C. Jiang, Y. Miao, L. Feng, Z. Lin	236289	Photocatalyst-enzyme hybrid anode enhanced glucose deep oxidation for bioelectricity generation under visible light	236229
Other Electrochemical Power Sources: ENG/APP		Y. Cang, Y. Yuan, X.L. Li, T. Song, J. Xie	
Effect of electrode thickness and compression on the performance of a flow-through mode vanadium redox flow battery cell		The single Fe atom anchored to graphitic carbon nitride doped air-cathode for bioenergy generation and tetracycline degradation in microbial fuel cells	236228
M.M. Prasanna, S. Jayanti	236203	Y. Feng, D. Li, T. Xie, Y. Shu, J. Jiang, F. Li	
Enhanced energy harvesting performance of bendable thermoelectric generator enabled by trapezoidal-shaped legs		Direct Fuel Cells: SCITECH	
M.A. Okirigiti, C.M. Kim, H. Choi, N.R. Alluri, C. Baek, M.-K. Lee, G.-J. Lee, K.-I. Park	236254	Spontaneous competitive reduction derived PdRu/rGN hybrids as high-efficient bifunctional electrodes for H_2O_2 -based fuel cells	236209
Unveiling the central metal effects in thiophene-substituted metalloporphyrins electrodes for electrochemical energy sources: A first-principles study		L. Sun, F. Wen, L. Li, H. Guo, Y. Zhang, L. Shi, Y. Xu, M. Song, W. Zhuang, W. Tan	
H.A. Ali, M.K. Noor, A.D. Bani-Yaseen	236284	Evaluation and optimization of microfluidic fuel cell with filter paper separator	236253
Impact of dry ball milling and degradation mechanism analysis of flake-shaped silicon anodes using dynamic distribution of relaxation times (DRT) method		T. Ouyang, T. Lu, Y. Feng, R. Yan, W. Liu	
H. Gao, L. Li, C. Yao, J. Jiang	236268	Polymer Electrolyte Membrane Fuel Cells: ENG/APP	
Other Electrochemical Power Sources: SCITECH		High proton-conducting phosphine oxide- and pyridinyl-based fluoro-sulfonated proton exchange membranes with enhanced chemical stability	236201
Enhanced lifespan of flexible rechargeable zinc-air batteries via cobalt phthalocyanine-carbon support interaction		B. Ghanti, R. Kamble, H. Komber, B. Voit, S. Banerjee	
X. Li, M. Yin, J. Zhang, C. Jiang, X. Ning, X. Chen, Z. An, Y. Chen, P. Chen	236236	Precise anchoring of atomically dispersed platinum on defect-rich molybdenum dioxide arrays for hydrogen evolution enhancement	236223
		Z. Fan, C. Gao, F. Cui, L. Yang, X. Wu, B. Pang, G. He	

Scalable gas diffusion electrodes doped with Sn²⁺ as a radical scavenger for durability enhancement of low-temperature PEMFCs
R. Maurya, P. Morgen, R. Sharma, S.M. Andersen 236243

Rapid synthesis of PtRu nanoparticles on aniline-modified SWNTs in EMSI engineering for enhanced alkaline water electrolysis
Y. Luo, Y. Qiao, H. He, M. Chen, G. Liu, X. Liu, L. Pan, Z. Feng, R. Tan 236297

Polymer Electrolyte Membrane Fuel Cells: SCITECH

Enhancing hydrothermal durability of gas diffusion layer by elevated temperature treatment technique for proton exchange membrane fuel cell application
H. Su, T. Wu, H. Liu, W. Zhang, Q. Xu, J. Ren 236192

Numerical study of proton exchange membrane fuel cells with airfoil cross flow field
T. Cheng, Q. Liu, G. Jiang, B. Yang, X. Wang, P. Wang 236232

Effect of Ti doping on properties of TiN/(Ta, Ti)N coated TC4 bipolar plate in proton exchange membrane fuel cells environment
W. Li, Y. Wang, X. Li, X. Zhou, X. Jiang, C. Xiong, Y. Chen, F. You, Z. Guo, Y. Zhang, L. Liu, X. Li 236227

The effect of ion exchange capacity values of sulfonated poly(oxindole biphenylene) ionomer in cathode for proton exchange membrane fuel cells
G. Chao, H. Gao, T. Guo, L. Wu, X. Zhou, D. Cai, K. Geng, N. Li 236246

High Temperature Fuel Cells: ENG/APP

Laser additive manufacturing of functional metallic components for solid oxide fuel cells
K. Du, C. Song, P. Wang, D. Dong, B. Yuan, T. Liu, K. Wen, X. Yan, M. Liu, H. Liao 236166

Thermo-electrochemical and mechanical analysis of the direct internal reforming solid oxide fuel cell stack using a validated numerical model
Q. Ma, X. Zhang, H. Fang, B. Zhu, Y. Wu, X. Xu 236226

Three-dimensional dynamic multi-physics modeling and long-term degradation performance analysis of solid oxide fuel cell considering carbon deposition
B. Li, C. Wang, C. Liu, M. Liu, J. Yan 236195

High Temperature Fuel Cells: SCITECH

Enhanced PCFC performance via anode additive BaCO₃–Induced grain growth in BZYb electrolyte
A. Sharma, K. Watanabe, H. Shimada, M. Jeem, Y. Yamaguchi, K. Nomura, M. Momai, Y. Mizutani, H. Sumi, M. Fujioka 236198

Microstructure-based modeling of inner oxygen pressure in solid oxide electrolysis cells: Analysis of electrode delamination and mitigation
F. Xue, Y. Lei, T.-L. Cheng, T. Yang, W.K. Epting, H. Abernathy, Y.-H. Wen 236199

Rational design of A-B sites Co-exsolution nanoparticles perovskite-based electrodes for promoting electrocatalytic kinetics in solid oxide fuel cells
N. Sun, F. Jin, P. Wang, T. Chen, Y. Ling, S. Wang 236219

Life prediction method of solid oxide fuel cells based on mechanistic damage and electrochemical performance degradation
H. Zheng, W. Jiang, Y. Luo, M. Song, X. Zhang, S.-T. Tu 236202

DRT-based electrochemical investigation on the fuel electrode in a Molten Carbonate Electrolysis Cell
S. Lo Conte, S. Mataloni, M. Della Pietra, L. Simonetti, Y. De Pra, M.C. Annesini 236197

High-performance porous metal-supported solid oxide electrochemical cells with a reduction shrinkage optimized NiFe-based support
D.-C. Lu, J.-H. Zhang, Z.-X. Wang, Y.-Z. Tian, S.-L. Zhang, C.-X. Li 236247

Asymmetric glancing angle co-sputtering method for the nanostructural and compositional engineering of nanocomposite anodes for thin-film solid oxide fuel cells
J. Hwang, D. Gil, W. Jeong, Y. Jang, J. Yoo, S. Lee, W. Yu, S.W. Cha 236252

Numerical study on current leakage of a tubular protonic ceramic fuel cell
X. Huang, J. Shi, Z. Liu, Y. Wang, X. Ye, Y. Shi 236241

A self-assembled composite cathode with enhanced activity and stability for protonic ceramic fuel cells
S. Lei, J. Ma, W. Li, M.B. Hanif, C.-X. Li, D. Wang, S. Wang 236257

Ni-doping strategy for perovskite anodes towards high-performance ammonia-fueled SOFCs
O. Rahumi, Y. Yuferov, L. Meshi, N. Maman, K. Borodianskiy 236320

Fuel Processing

Efficient biomass-derived catalysts for alkaline short-chain alcohols electroreforming: A focus on low platinum loading
G. Alemany-Molina, E. Mosca, C. Lo Vecchio, A.S. Aricò, E. Morallón, D. Cazorla-Amorós, V. Baglio 236298

Supercapacitors: ENG/APP

High-performance aqueous sodium-ion storage using scalable and surfactant-free flower-like manganese oxide/reduced graphene oxide electrodes
K.B. Lankamsetty, G.K. Veerasubramani, G. Nagaraju, S. Sengodan, A.A. AlHammadi, V. Hiremath, G.N. Karanikolos, H.K. Yang 236221

2D metal-organic framework Cu₃(HHTP)₂ composite electrode for flexible energy storage applications
M. Prince, J. Kanathedath, F. Paul, P.R. Markapudi, M. Beg, L. Paterson, M.P. Desmulliez, S.C. Pillai, L. Manjakkal 236214

In-situ grown CoVSe/reduced graphene oxide nanocomposites as bifunctional electrode material for supercapacitors and lithium-ion batteries
M. Zhang, Y. Li, H. Qin, W. Yang, X. Chen, R. Zhang, Z. Yang, S. Fan, H. Wu 236251

Fabrication of cobalt oxide@cellulose/nitrogen doped carbon nanotubes decorated metal organic frameworks composite for symmetric supercapacitor applications
S. Ramesh, I. Rabani, T. Indumathi, H.M. Yadav, M. Selvaraj, K.R. Pai Sunajadevi, Y.-S. Seo, J.-H. Kim, H.S. Kim 236288

Three-dimensional nitrogen-doping hierarchically porous carbon derived from polyacrylamide-lignocellulose aerogel for high energy density supercapacitors
Z. Ma, W. Wang, Q. Bai, F. Zhou, C. Ma, Y. Shen 236304

Supercapacitors: SCITECH

High-temperature energy storage capability of flexible polyimide film incorporated with compatible covalent organic framework

L. Chen, D. Zheng, F. Zhai, L. Xu, H. Ye

From 2D to 3D: Green synthesis of wrinkled MXene thin-film electrodes for ultra-high specific capacitance and structural resilience combination of supercapacitors

L. Di, X. Yan, C. Chu, F. Zhang, J.M. Moradian, Z. Shahnava

A hydrogel electrolyte with dynamically Tunable mechanical properties for wide-temperature flexible supercapacitor

J. Han, C. Fan, D.-s. Li, L. Jiang

Ultrahigh surface area self-nitrogen-doped nanoporous carbon materials from *Macrotyloma uniflorum* (Horse gram) seed for high-performance supercapacitor applications

M.P. Adhikari, S. Shahi, R. Ma, J.P. Hill, K. Ariga, L.K. Shrestha

Supramolecular-mediated high nitrogen doping hierarchical porous carbon cathodes with multi-physi/chemisorption sites for Zn-ion hybrid supercapacitors

Y. Li, M. Chang, P. Chai, Q. Guan, J. Li, L. Li, L. Bao, W. Deng, J. Peng, X. Li

Photo-Electrochemical Cells

A benchtop route of doping Bi into Ag₂S colloidal quantum dots for eco-friendly solar cells

H. Cao, Y. Wu, R. Gao, P. He, Q. Wu, J. Cui, L. Gu, T. Cai, P. Peng, Y. Lei, Y. Lin, Z. Zheng

Hydrophilicity and electronic structure modulation of Pb-doped RuO₂ for pH-universal oxygen evolution catalysis

X. Dong, J. Wang, Y. Hao, Y. Sun, X. Zhang, B. Xu, C. Li

Effect of annealing temperature on morphology, optical, and photocatalytic characteristics of hydrothermally synthesized Bi(Ti_{0.5}Co_{0.5})O₃ perovskite nanorods

V.-Q. Nguyen, M. Sheraz, T.C. Phan, P.S. Chung, K. Han, H. Seo

Phase-tunable cobalt borides with amorphous shell toward highly efficient oxygen evolution reaction

Y. Gao, X. Yang, Y. Zong, L. Bao, R. Ma, J. Zhao

Dopant-free hole-transporting material with passivation effect based on Benzo[1,2-b:4,3-b']dithiophene for inverted perovskite solar cells

D. Zhang, X. Wei, B. Yu, H. Wu, H. Tang, L. Wang, H. Yu, D. Cao

Low nickel loading carbon microfibers fabricated by electrospinning for the glycerol electrooxidation coupled with the continuous gas-phase CO₂ reduction reaction towards formate

K. Fernández-Caso, Z. Hagheh-Kavousi, Y. Holade, D. Cornu, G. Díaz-Sainz, M. Álvarez-Guerra, A. Irabien, M. Bechelany

Applications

Enhancing solar cell efficiencies through strategic chlorination of quinoxaline-based D-A-type polymers
J.A. Prayogo, S. Byeon, J.W. Yoon, Y. Yu, Y.K. Lee, S.Y. Lee, H. Ahn, D.R. Whang, S.-J. Ko, D.-W. Kang, J. Lee, H. Choi, D.W. Chang

Ultrafast synthesis of lignin-based graphene by flash joule heating for multifunctional applications

X. Mao, Y. Zhang, H. Li, N. Zhao, H. Zhang, P. Zhao, J. Song, W. Zhang, X. Huang

Multifunctional non-stoichiometric tungsten oxides:

Synthesis, properties and application

Y. Li, W. Zhou, D. Li, J. Xu

An estimation framework for battery pack state of health based on real vehicle charging and discharging features

Z. He, X. Ji, H. Ding, Y. Li, G. Xu, Y. Dai, H. Lou

Investigation of chromium and tungsten doped molybdenum di selenide as counter electrode in dye sensitized solar cells for efficient solar energy conversion

U. Ansari, S. Kashyap, A. Singh, S. Maken, D. Poddar, S. Thakur

Corrigendum

Corrigendum to "Molten carbonate electrolyzer for synthetic fuel generation" [Journal of Power Sources, Volume 628, 1 February 2025, 235741]

A. Martsinychuk, A. Szczęśniak, K. Martsinychuk, O. Dybiński, G. Cinti, J. Milewski, P. Shuhayeu, M. Łazor, K. Ćwieka, J. Skibiński, A. Boczkowska
